

Canadian League Against Epilepsy

**2014 CLAE Biennial Meeting
Partnership Proposal
October 17-19
London Convention Centre
London, ON**

Dear Industry Partners:

On behalf of the Canadian League Against Epilepsy (CLAE) and the CLAE Biennial meeting organizing committee, we invite you to join us at the 2014 meeting in London from October 17-19, 2014.

CLAE Biennial Meeting is the premiere meeting of professionals with an interest in epilepsy. These include neurologists, neurosurgeons, psychologists, nurses, EEG technologists, neurophysiologists, electroencephalographers as well as residents and students in training. This meeting provides a unique opportunity for the industry to network, collaborate and partner with all these professionals in one place and under one roof. Additionally, the meeting this year will be a joint meeting between the CLAE and the grass root organization Canadian Epilepsy Alliance, a strong advocacy group with branches across Canada, further adding value and opportunities for networking. All our meetings in the past have had a strong industry presence and I invite you to be a part of this dynamic group.

The educational committee has put together a very strong scientific program which is in the final stages of completion.

I hope that your company will seriously consider supporting and sponsoring this conference and showing your ongoing support for epilepsy care in Canada.

We look forward to seeing you in London!

Sincerely,

S. Nizam Ahmed, MD, FRCPC
CLAE President

We are committed to a mutually beneficial relationship with our industry partners. Please contact [Andrea Smith](mailto:andrea.smith@clae.org) to discuss how we can best partner together to make your conference experience a success.
